

FOR IMMEDIATE RELEASE

Trades Recommended by OptionGenius.com Made Investors 11.87% in April

Houston, TX, May 16, 2009 – Most people trading on the stock market last month were probably ecstatic if they broke even, given the ongoing volatility of stocks in response to an economy that just keeps pummeling the nation's largest corporations. But members of OptionGenius.com (<http://www.optiongenius.com>) enjoyed considerably more encouraging--and profitable--results: Trades recommended by the service made a monthly return of 11.87% in April 2009. And right now, \$1.00 lets anyone try out the OptionGenius.com service for a full month.

Founded by Allan Sama, OptionGenius.com lets anyone see Sama's actual option trades and adjustments through real-time updates; by making the same trades themselves, OptionGenius.com members can enjoy the average 8% to 10% monthly returns Sama consistently achieves. Even with the Dow down 34% in 2008, Sama and his members made 102.14% for the year.

At the heart of OptionGenius.com is the story of a man who took his lumps, learned everything he could to do things better next time, and decided to help others get ahead. When Sama began trading stocks, he did everything the experts advised. Within a year, he had reduced his savings from \$83,000 to \$34,000. Discouraged, Sama decided he would not make another trade until he figured out what he had been doing wrong and what he had done right. He noticed trading options was the only technique that had consistently earned him money.

Sama threw himself into learning all he could about options trading. Countless books and seminars and hundreds of hours later, he was an expert with his own trading plan. He back-tested his plan back to the mid-'90s, and it consistently made money. Using his new technique, he began trading again--and began making serious profits. He decided to let other people see exactly what he was doing as he was doing it, and OptionGenius.com was born.

OptionGenius.com uses trades that have over a 75% probability of success to generate double-digit monthly returns with limited risk. Sama carefully selects each trade and makes adjustments when needed. And he uses his own money to make the trades right along with his members.

Sama had altruistic reasons for creating OptionGenius.com. His mission: To eradicate global poverty within the next 100 years. By helping others attain financial independence through OptionGenius.com, Sama feels he is doing his part to reach that goal. In return, he expects OptionGenius.com members to pay it forward. In fact, anyone who donates \$100 to Sama's favorite charity, the Aga Khan Foundation's PartnershipsInAction (<http://www.partnershipsinaction.org/>), will receive 30 minutes of phone time with Sama.

“A friend told me about [OptionGenius.com] and ... I decided to try [it] out,” stated OptionGenius.com member Martin Carmichael. “Boy, am I glad I did. I don’t do every trade [OptionGenius.com posts], just one a month, but I am already up 30% since I signed up.”
